

Invisalign

The clear alternative to braces.

Consider Invisalign to get the beautiful straight teeth you've always wanted - without braces. Invisalign uses a series of clear aligners that are custom-molded to fit you. The virtually invisible aligners gradually reposition your teeth into a smile you'll be proud of.

-

Remove your aligners to eat, brush and floss

-

Change aligners every two weeks

-

Your teeth move little by little

-

Regular progress checks with Dr. Davantzis

-

Results often in 6 months to 1 year

Why people prefer Invisalign

The convenience and ease of use of the Invisalign system have made it the choice of over half a million people. In fact, Invisalign has been effective in giving hundreds of thousands of people amazing new smiles. Not only are the aligners invisible, they are removable, so you can eat and drink what you want while in treatment, plus brushing and flossing are no problem. They are also comfortable, with no metal to cause mouth abrasions during treatment. And, no metal and wires usually means you spend less time in your doctor's office getting adjustments. Invisalign also allows you to view your own virtual treatment plan when you start, so you can see how your straight teeth will look when your treatment is complete.

-

Most people won't notice you're in treatment

-

Won't disrupt your lifestyle

-

Free initial consultation with Dr. Davantzis

No metal wires or bands to irritate your mouth, and best of all, most people won't notice you're in treatment. Invisalign®, the clear alternative to braces, has been chosen by over 600,000 people who want amazing smiles.
